

Introduction to Pro|ENGINEER

Description As Pro|ENGINEER has become more user friendly, the length of an introductory course has shortened to three days. This course provides the student with the basic information that is required to begin modeling and drawing tasks back on the job.

Topics The following topics are included in this training manual:

- The User Interface
- Opening, Viewing and Modifying Models
- Sketched Features (Extrude, Revolve, Sweep, Blend)
- Direct Features (Hole, Shell, Draft, Round)
- Datum Features
- Patterns
- Parent/Child Relationships
- Layers & Suppression
- Component Assembly
- Basic Drawing Creation

Audience This course is intended for users that have no prior Pro|ENGINEER experience.

Format The training material has been developed following the traditional "lecture/exercise" format. Each chapter contains detailed explanations of functionality and Tips, Tricks & Techniques. Multiple hands-on exercises follow each lecture to provide a structured method of reinforcement and retention.

Duration 3 Days

Version Wildfire 4.0
